

CYBER Made Simple With IBG

What is Cyber Insurance?

When a breach occurs, cyber insurance covers the range of expenses that arise. These include identifying and solving the breach, recovering data, customer notifications, PR costs, possible credit monitoring expenses, legal expenses, potential fines from compliance regulators, extortion costs from ransomware, and general business interruption.

Most CGL and E&O Policies don't cover the majority of today's cyber perils. Further, endorsements typically have lower limits and/or incomplete coverage. Now is the time for insured's to purchase a stand-alone Cyber Insurance policy.

Not Appointed? Fill out the Appointment Info Sheet and submit to newappointments@ibgreen.com.

See next page on quoting/system info.
